

Amendments to the Claims:**Listing of Claims:**

1. (Currently amended) Device for cage (1) for shellfish farming, where the cage is placed in the sea or in a tank with water, characterised in that the cage's comprising one side of said cage (1) is being provided with openings, for instance a grid (13) and where the cage's other sides of said cage (3, 5, 7, 9) preferably are closed and where wherein the cage (1) is arranged to be turned so that said one side equipped with openings (11) faces upwards in a vertical feeding position, or faces sideways in a horizontal eating and resting position, or faces downwards in a vertical emptying position, as these positions are being achieved by means of the fish farming cage (1) being placed on or by a transporter (25, 55).

2. (Currently amended) ~~Device~~ The device according to ~~one or more of the previous claims claim 1~~, characterised in that wherein each cage (1) is attached to the transporter (25) by means of the cage's (1) a back one of said sides of said cage wall (5) being provided with couplings (19).

3. (Currently amended) ~~Device~~ The device according to ~~one or more of the previous claims claim 1~~, characterised in that wherein the cage's (1) sides (3, 5, 7, 9) are provided with buoyancy elements large enough for a detached cage (1) to float in water.

4. (Currently amended) ~~Device~~ The device according to claim 4 ~~1~~, characterised in that a loose fish farming wherein the cage (1) is provided with devices (3, 52) which render the cage (1) suitable for being grasped and led forwards forward by a the transporter (55) in motion.

5. (Currently amended) ~~Device~~ The device according to claim 4 ~~or 5~~, characterised in that wherein the transporter (55) is provided with devices (53, 63, 65, 69) suitable for grasping and locking a the cage (1) which with its front wall (11) said one side of said cage facing upwards is being brought in towards the an upper part of the transporter (55).

6. (Currently amended) ~~Device~~ The device according to ~~one or more of the previous claims claim 1~~, characterised in that each fish farming wherein the cage (1) is provided with slots (21) for fastening partition walls (23).

7. (Currently amended) ~~Device~~ The device according to claim 1 one or more of the previous claims, characterised in that the fish farming wherein the cage (1) is placed on or by the transporter (25) so that it by the transporter's (25) an upper end of the transporter (32) has a vertical position with its said one side of said cage front wall (11) facing upwards, that it

~~in the transporter's and a lower end (38) have of said transporter has a vertical position with its front wall (11) said one side of said cage detached and facing downwards, and that it in the sections in between has a horizontal position, alternatively a vertical position where the front wall faces upwards, alternatively a vertical position where the front wall faces downwards and is covered.~~

8. (New) The device according to claim 7 wherein sections between said upper end and said lower end have a horizontal position.

9. (New) The device according to claim 7 wherein sections between said upper end and said lower end have a vertical position where the said one side of said cage faces upwards.

10. (New) The device according to claim 7 wherein sections between said upper end and said lower end have a vertical position where said one side of said cage faces downwards and is covered.
